7NT by North

Baker Squeeze 9

South's 3NT rebid shows 6 ♠s headed by A K Q and nothing else. North is to play 7NT. East leads the ♦ Q.

Win the ♦ K and (IMPORTANT!) test the ♣s first by playing ♣ A K Q. Darn. East discards a ♦ on the ♣ Q.

Play your 4 ♥ winner's next. East follows suit while West follows twice, then discards 2 ♦ s.

Play your ♦ A. West must give up.

If he throws the ♣ J, you win. But if he throws a ♠ you also win. This is what is called a Win-Win bridge play.

6NT by West

Baker Squeeze 10

East is to play 6NT. South leads the ♦ J. North takes the ♦ A and returns the ♦ 2.

With all those high ♦ s falling on the first two tricks dummy's ♦ 9 has become a threat against South. If it should happen that South also holds the only ♥ stopper you can squeeze him in the red suits.

On the last 2 ♣ s South discards a ♦ and a ♥.

You discard a small ♥ from dummy while South follows suit three times.

Play your ♠ J and watch what South discards.

If he holds on to the ♦ T you will discard dummy's useless ♦ 9 and hope the ♥ s all fall under the ♥ A K.

If he discards the ♦ T then you throw dummy's small ♥ and dummy wins the last three tricks.

6NT by South

a ♠ dummy's ♠ 5 will win the last trick. This is soooo much fun.

Baker Squeeze 11

South is to play 6NT. West leads the ♥ J. East wins the ♥ A and returns the ♥ 2.

No matter how the ♠ s split only one defender will hold the Guard because only one defender can have as many as 4. IF (it's a big IF) that same defender holds the ♣ K then you can squeeze him.

Can you see how the squeeze is going to work?

The solution is the Vienna Coup. Play a ♣ to the ♣ A at trick 3.

Then start running the ♦ suit.

So far neither defender is hurting, but that is about to change.

You play your ♦ 3 and discard dummy's ♣ T.

East is squeezed. He can't throw his ♣ K without letting your ♣ Q become a winner. But if he discards

6 ♥ by East

Baker Squeeze 12

West is to play 6 ♥. North leads the ♠ Q. South wins the ♠ A and plays the ♦ K.

In this hand dummy's fourth ♣ is an obvious Threat, so you should ask yourself if you can find another Threat for when ♣s don't split 3-3. Another thing you have probably noticed is that although 3-3 splits happen about 40% of the time in real life, they NEVER happen in these pages!

Play 5 ♥ winners and the ♠ K.

Play your ♥ 2 and dump dummy's ♦ 6.

South has no answer.
