Baker Holdup 1

North is to play 3NT. East leads the ♦ K.

Winners: ♠=4 ♥=0 ♦=1 ♣=1 Total = 6

You need 3 more winners, and they must come from the ♥ suit. The danger is that when you knock out the ♥ A, East may take too many ♦ s. To exhaust West of ♦ s you hold-up your ♦ A until the third round.

Next you start on ♥ s by playing ♥ K, then overtaking the ♥ T. Assume that West wins the second ♥.

You were fortunate it was West who took the ♥ A, and that he has no ♦ to return. If he plays a ♥ or a ♠ you will win in dummy. If he plays a ♣ you will jump up with the ♣ A and take your winners, 9 in all.

But if you had not held-up your ♦ A even good luck wouldn't have helped you.

♥ A. Voila!

But what if East actually held 4 ♠s? No problem, in that case the ♠s would have split 4-4 so the defenders could only win 3 ♠ tricks and the ♦ A.

The hold-up lets you make the contract whenever East holds the ♦ A. And if West happened to hold the ♦ A??? You go down.

Baker Holdup 2

South is to play 3NT. West leads the ♠ K.

Winners: ♠=1 ♥=2 ♦=0 ♣=2 Total = 5

Even if ♥s split 3-3 you could only get 2 extra winners there, so it should be clear that you must establish the ♦s. You will have to drive out the ♦ A and hope they don't win too many ♠s at that time. You can help your chances by a hold-up of the ♠ A until the third round.

Having just taken the third ♠ trick you now work on ♦s by first playing the ♦ K, then continuing the suit. East wins the third one with his ♦ A. And now the good news - he has no ♠ left to reach his partner's good tricks. So East plays the ♥ Q.

At this point in the play you have three tricks in the bank; ♠ A, ♦ K, ♦ Q. You take your ♥ K, cash the two good ♦s, then lead to dummy for the ♣ A K and

Baker Holdup 3

North is to play 3NT. East leads the ♠3. West wins the first trick with the ♠A and returns the ♠8.

Winners: ♠=1 ♥=2 ♦=1 ♣=3 Total = 7

You can win 3 more ♦ tricks if the finesse works, but even if it doesn't work you can still get the 2 that you need. Of course if West does win the ♦K it would sure be great if he had no ♠ to lead. So you duck the second ♠ and take your ♠K when they play a third round.

After winning the ♠K you are conveniently in your hand, so you play the ♦Q and let it ride when East plays a low card. Alas, West takes the trick with his ♦K.

It's too bad the finesse didn't work, but it's not too too bad! Because West is out of ♠s and must lead one of the other suits. You don't care which he leads because you can now win 8 more tricks and make your contract.

And as long as you had held up on the ♠K until the third round you could ensure that West was out of ♠s if he had started with only 3.

The rest of the tricks are yours, nine in all.

But with this layout you needed to hold up twice.

Baker Holdup 4

South is to play 3NT. West leads the ♦ K.

Winners: ♠=3 ♥=2 ♦=1 ♣=0 Total = 6

You will need some ♣ tricks to make the contract. If West has 5 ♦s and also the ♣A then you will go down. It doesn't matter if he has the ♣Q because you can finesse him out of that.

But in the case where East has both the ♣ A Q you need to make sure he has no ♦ when he takes his first trick. So hold up the ♦ A until the third round, everybody following.

Now start on the ♣s. Play your ♣9 and let it ride. East wins the ♣Q and returns a ♠. Good, he didn't have the fourth ♦.

Win with dummy's ♠Q and force out the ♣A.
