Lead: ♦ A

You are East. The bidding has been as shown. Partner led the ♦ A, dummy played the ♦ 3 and it is your play.

When you have made your choice

You know partner also has the ♦ K, and normally you would give an encouraging signal when you hold the Queen. But with this hand you want partner to switch to ♣s as soon as possible. So you play a low ♦.

West looks at your signal, then looks at dummy, then looks at your signal. He knows you want a switch and it looks like a switch to ♣s might work the best. South plays a low ♣ from dummy, you win the ♣ J. Next you play a low ♦, taken by West with his ♦ K. West leads a ♣. Dummy plays the ♣ K, you win that, cash another

♣, then cash your ♦ Q. That first signal led to your side winning the first 6 tricks. Wow.

You are West. The bidding has been as shown. You led the ♥ A, East puts on the ♥ Q. It's your play.

When you have made your choice

East's ♥ Q is either a singleton, (practically impossible), or a signal showing that he also holds the ♥ J. In either case you can reach the East hand on the second trick by playing a low ♥. Since you don't particularly want to start playing ♦s from your side, you go ahead and play a small ♥, won by East with the ♥ J.

East next plays the ♦ Q and however South tries it your side will take the next two ♦ tricks and set the contract.

♥ K 2  
♦ Q J 8  
♣ 8 7 6

You are East. The bidding has been as shown. West led the ♦ A, dummy played the ♦ 2 and it is your play.

When you have made your choice

As soon as dummy appears you can see 3 tricks for your side. Partner surely has the ♦ K to go with his Ace and you have a certain trump trick. However, that's all you can see.

Your best hope is that West may be able to win a ♠ trick, and it may be important for the first ♠ lead to come from your side of the table.

Your ♦ Q play informs partner that you also have the ♦ J, giving him the option of underleading his ♦ K to get to your hand.

West next plays a small ♦ which you win with your ♦ J. You return the ♠ T. This establishes West's ♠ K before South can pull trumps and discard one of dummy's ♠s on his fourth ♣.

You are West. The bidding has been as shown. You led the ♠ 5, East plays the ♠ T and South wins the ♠ K. To the second trick South plays the ♣ T and you must discard something.

When you have made your choice

You know that East has no high ♠ honor or he would have played it to the first trick. So South has the ♠ A Q left, plus all those ♣ tricks. You need to have West switch to a ♥ if possible.

East must be expecting to lead a ♠ back when he wins the ♣ Q which you hope he holds. Your ♠ J discard may make him rethink. If your ♠s were any good why would you be discarding a winner when all you had to do was toss a small red card?

Hopefully East will come to the conclusion that this is Suit Preference for a ♥ return and will play his ♥ J. Hopefully.

You are East. The bidding has been as shown. Partner led the ♠A, dummy played the ♠2 and you signal with your ♠T. West next plays the ♠Q and you drop the ♠4, completing your doubleton signal. West then plays the ♠K and it turns out you don't have to ruff after all. So what are you going to play?

When you have made your choice

This should be a clear enough signal for West to play a ♣ to your ♣A next.

An alternate play, just as good, would be for you to ruff the good ♠Q and play the ♣A yourself.

If you don't get your ♣ trick at trick 4 you will never get it. South will discard his ♣K on North's extra ♦ winner.
