Baker Signals 1

You are West. The bidding has been as shown. You led the ♠K, East played the ♠7 and South the ♠5.

What do you play to the second trick?

When you have made your choice

You can see the ♠6, ♠5, ♠4, ♠3 and ♠2. So the ♠7 is East's lowest ♠, he is doing his best to discourage you from leading the suit again.

South held up with ♠ A J x, hoping you would play the suit again and give him two tricks.

If you play the ♦T East will win the ♦A and return a ♠, allowing you to drive out South's ♠A while you still have the ♣A for an entry.

likely, but if it happens just congratulate South for the fine play.

Baker Signals 2

You are West. The bidding has been as shown. You led the ♠K, East played the ♠7 and South the ♠8.

What do you play to the second trick?

When you have made your choice

You cannot see the ♠5. The most likely reason is that East has it, and his ♠7 is an encouraging signal. The only reason he would encourage you is if he held either the ♠A or ♠J.

Together, you two continue to play ♠s to drive out South's ♠A. When you get the lead with your ♣A you will cash your ♠ winners and East will still have the ♦A for some icing on the cake.

There IS another possibility if South is a better than average Declarer. East just might hold ♠97, giving South ♠A J 8 5. South played the ♠8 as a falsecard to tempt you into playing the suit again. This isn't too

Baker Signals 3

You are East. The bidding has been as shown. Partner led the ♣A, dummy played the ♣4 and it is your play.

When you have made your choice

West will play the ♣Q on which you will play the ♣2.

West now knows you started with a doubleton, and more importantly, he also knows you want him to play a third ♣.

When he next plays the ♣K dummy will ruff, but whatever card he ruffs with you will have established a trump trick. When you later win your ♠K that will be down 1.

Baker Signals 4

You are West. The bidding has been as shown. You led the ♦5, East wins the ♦Q and returns the ♦7. South holds up his ♦A until the third round. He then plays the ♣Q and it is your play.

When you have made your choice

You assume (hope) that East holds the ♣A. If he does then he will need help from you to decide which trick he should win. You play the ♣8 first, and the ♣2 next to show an even number.

If East is paying attention he will know to win the THIRD ♣. This will kill dummy's ♣ suit, and with it South's chance of making 9 tricks.

Baker Signals 5

You are East. The bidding has been as shown. Partner led the ♣A, dummy played the ♣2 and it is your play.

When you have made your choice

If you signal with the ♣9 West will continue with the ♣K and another which you will have to ruff. You will give up your NATURAL trump trick by doing so. Worse, you will allow North's ♣J to be established as a winner that South can later discard a ♦ on.

Much better to play low. Partner will surely switch to a ♦, and South will probably finesse, though it doesn't matter whether he does or not. You will win the ♦K, return the ♣9 back to West's ♣K, and still have your trump trick for later.
