6 NT by South

This is another example of "She who knows, goes."

NORTH has a solid 18 points, (1 extra for the fifth Club), so when SOUTH opens 1 NT

she

KNOWS

that together they must hold at least 33 points. They may even have 35 points.

In any case they should be in slam, so NORTH

GOES

to 6 NT.

3 NT by South			

SOUTH has 20 points, counting one extra for the fifth Diamond. Just right to open 2 NT.

NORTH has 6 points, just enough to bid 3 NT.

(20 + 6 = 26) (21 + 6 = 27)

3 NT by South			

After NORTH passes initially, SOUTH opens 1 NT.

With 9 points, NORTH has invitational strength, so he says 2 NT.

SOUTH has a small problem - NORTH's bid tells her to bid 3 NT with 17 points, but to pass

with 15 points. Her problem is that she has 16! Since it looks to her like a "good" 16 points

she bids 3 NT. If those 10's and 9's had been 4's and 3's she would have passed.

6 NT

SOUTH has a great 1 NT hand - 17 points and 4-3-3-3 shape.

NORTH has 16 points; he figures it is possible that SOUTH can make a slam, but only

if she has a 17 point opener. So he bids 4 NT, expecting SOUTH to bid 6 NT if she has 17 points

but to pass if she has fewer.

He figured right - SOUTH had 17 points so she bid 6 NT.

6 NT by South

NORTH definitely does NOT have a balanced hand. She has two doubletons and a

6-card Club suit.

But she DOES have 18 points, (two extra for the fifth and sixth Clubs), and her 18 added to

SOUTH's minimum of 15 is enough to bid 6 NT.

Notice how easy this will be to play once that Club suit is established.
