4 ♠ by North

West dutifully plays a ♥ and you take the next three tricks. Had he switched to a ♦ instead, South would have been able to discard one of his ♥ losers on North's ♦ Q.

Baker Signals 16

You are East. The bidding has been as shown. Partner led the ♣ K, dummy's singleton was played and it is your play.

When you have made your choice

West will look at your ♣ 9 and perhaps think for an instant that you want him to play another ♣.

But it will be a short instant because a look at dummy makes it absolutely clear to everybody that playing another ♣ could not help your side. Dummy has so many trumps that repeated ♣ leads would do nothing.

OK. If it's not an encouraging Attitude signal, what is it? Suit preference of course. Since it is a high spot card you are asking West to switch to the higher suit (choosing between ♦ s and ♥ s).

Baker Signals 17

You are East. The bidding has been as shown. Partner led the ♣ A. Seeing your ♣ 3 he next played the ♦ A. What will you play on this trick?

When you have made your choice

Normally with this holding you would play the ♦ 9 to encourage West to play a second ♦ through dummy's ♦ Q T.

But this time you really want him to take his ♣ K. So play the discouraging ♦ 2 and hope he gets the message to go back to ♣ s. If he does play the ♣ K next it will win and he can then give you a ♣ ruff.

Baker Signals 18

You are East. The bidding has been as shown. Partner led the ♥5, you put on the ♥J, South won with the ♥A. The second trick was ♦A, ♦2, ♦3, ♦5. The third trick was ♦J, ♦6, ♦8, ♦7. South then put the ♣Q on the table.

When you have made your choice

Does it look to you like South is trying to create an entry to dummy so he can cash the 2 ♦ winners? That's what he wants it to look like, hoping someone holds up their ♣A.

But don't believe Declarer, believe your partner. On the first ♦ West played the ♦2. On the second ♦ he played the ♦6. He has an odd number of ♦s, obviously 3. And South must also have a third one, so he is up to some trickery with that ♣Q.

So grab your ♣A and return partner's ♥ suit.

fails.

If you had not been paying attention to West's signal you might have decided to risk a ♣ lead - with a disastrous result.

Baker Signals 19

You are East. The bidding has been as shown. The 2♥ bid was a transfer. The 5NT bid meant to choose either 6♠ or 6NT. South liked the suit. Partner led the ♠ 5, won by South's ♠ Q. South pulls one more trump with his ♠ A, then wins three high ♦ s. Next comes dummy's ♥ A on which he plays the ♥ 3 and West plays the ♥ 9. Then he leads dummy's ♥ 6 which you win with the ♥ Q. On this trick South drops the ♥ J and West the ♥ 2. It is your play.

When you have made your choice

If you believe South is now out of ♥ s then you should not play your ♥ K because it would give him a ruff-sluff.

But you shouldn't believe South when your partner has sent you a clear signal that he holds an EVEN number of ♥ s. In this case an even number must be 4 which means that South has one more ♥ . So you play your ♥ K. He ruffs in dummy of course, but then has no way to get rid of that ♣ loser when the finesse fails.

Baker Signals 20

You are West. The bidding has been as shown. You led the ♣A, East played the ♣2 and South the ♣9. What should you play to the second trick?

When you have made your choice

On first thought East's ♣2 seems to be a discouraging signal. Think again.

After the first trick you know the location of every ♣ except the ♣Q and ♣J. If East started with ♣ J 2 he would have signaled with the ♣J. If East started with ♣ Q J 2 he would have signaled with the ♣Q. Since he did neither he started either with singleton ♣ 2 or with ♣ Q 2. In either case you should play a low ♣ now which he will either win with his ♣Q or he will ruff.

It turns out that he wins with the ♣Q, then leads a ♠ back to your ♠ A Q.
