3 NT by South
Lead: ♠ 6

Partner's 2 NT bid invites you to bid game if you have a maximum hand. Your 17 points is certainly a maximum so you bid 3 NT.

Will you take your ♠ A immediately? or at trick 2? or trick 3?

You need 3 more tricks, and they must come from ♠s. So you must drive out the ♠ A. The problem is that when the defenders win the ♠ A they may also take 4 ♠ tricks.

While you cannot guarantee the contract you can at least give yourself a better chance by holding up your ♠ A on the first trick, and also on East's ♠ continuation. You win the third ♠ with your ♠ A.

Now you drive out the ♠ A. There are four possibilities: West may win the ♠ A and cash two more ♠s, down 1. West may win the ♠ A and cash just one ♠s, you make it. East may win the ♠ A and have a fourth ♠ to lead, you make it. East may win the ♠ A and be out of ♠s, you make it.

If you win the first or second ♠ trick you will fail.

When you attack ♠s, East will win the ♠ A and play a ♠.

Holding up twice can never hurt, and in this case it is the only way to make the contract.

In the pre-transfer days you would have bid 2 ♠ with this hand and partner would have passed. Now you make partner bid the ♠s first by saying 2 ♥. Partner dutifully replies 2 ♠. What do you say?

In the pre-transfer days you would have bid 2 ♠ with this hand and partner would have passed. Now you make partner bid the ♠s first by saying 2 ♥. Partner dutifully replies 2 ♠. What do you say?

You say pass.

The contract would be 2 ♠ played by South.

To make North the declarer ROTATE.

North plays 2 ♠. East leads the ♣ 2. West plays the ♣ Q which you take with your ♣ A.

Count losers in the long-trump hand, (dummy this time).

You can make the contract if you just force out their big trumps. But there is another tempting possibility. You could enter dummy with the ♦ K and play the ♥ 4, finessing West for the ♥ K. If the finesse is successful you could then discard dummy's ♣ loser on the ♥ A.

Should you or shouldn't you?

The reward for this play would be an overtrick. The price of failure would be going down in a cold contract. So obviously, at rubber bridge, you would be foolish to take such a risk. Playing Duplicate though, you might consider it. But let's say you decide to play safe.

Win the ♣ A and play a trump. As soon as you get in play another trump. The defenders will no doubt take their ♣ winner when they get in. West will no doubt win one of those high trump tricks, and he MAY lead a ♥ when he gets in. There you will be, trying to decide again whether to finesse . . .

As you see, the ♥ K is in the wrong place this time, but might be right the next time.

Usually you should not risk your contract for the sake of an overtrick.

Partner's 2 ♣ is Stayman convention. With no 4-card Major suit your response is 2 ♦. Partner now bids 2 NT. What do you say?

Partner's 2 ♣ is Stayman convention. With no 4-card Major suit your response is 2 ♦. Partner now bids 2 NT. What do you say?

The 2 NT bid is invitational, asking you to bid game with a maximum, pass with a minimum. You have 17 points so you bid 3 NT.

You put on dummy's ♣ J, but East wins the ♣ A then continues with the ♣ 9. Do you play your ♣ K now?

You need 3 more tricks, and they must come from ♦s. So you must drive out the ♦ A. The problem is that when the defenders win the ♦ A they may also take 4 ♣ tricks.

This is another case where you should hold up. Allow EW to win the second trick and take your ♣ K only at trick #3.

Now you drive out the ♦ A. If West has it and also started with 5 ♣s you will go down. But if East has the ♦ A you will make the contract no matter how ♣s split.

If you win the second ♣ East will still have a ♣ when he wins the ♦ A.

But if you hold up your ♣ K East will have no ♣ to put his partner in with.

Even if you wanted to show your ♦ suit how would you do it? If you bid 3 ♦ it would be a transfer and if you bid 4 ♦ you would have bypassed 3 NT, your probable best contract.

But you didn't want to bid them anyway, you just wanted to bid 3 NT, right?

The contract would be 3 NT played by South.

To make North the declarer ROTATE.

East leads ♥ 5, West plays the ♥ Q.

The first thing you need to decide is whether to hold up on the ♥.

First decide the holdup question. East led the ♥ 5 and you can see the ♥ 4, ♥ 3 and ♥ 2. Assuming East led fourth down he must have only a 4-card suit since there are no cards he could have lower than the ♥ 5. With ♥'s splitting 4-4 a holdup would do no good, and isn't necessary anyway.

So take the ♥ A. Then what?

You COULD try the ♦ finesse. Even if it loses it would establish several ♦ winners. However, if the defenders win just 1 ♦ trick they will quickly grab their 3 ♥ tricks and their ♠ A and put you down 1.

This is why it is important to make a Plan which includes a Winner count. You need just one additional winner and all you have to do to get it is play a ♠ honor.

When you can see all four hands, including the location of the ♦ Q, it kind of makes you wished you had finessed and gotten all those overtricks.

Good Bridge players like to take tricks, but they are not greedy.
