no ♥ to return so he plays a ♦ which you win with your ♦ A.

Play off your 7 winners and give up a ♣ at the end.

So you decide whether to hold up or not based on how you expect to play the hand.

Baker Holdup 5

With his 4-3-3-3 distribution South chooses not to bother with Stayman. North is to play 3NT. East leads the ♥ 6. West plays the ♥ J.

Winners: ♠=1 ♥=1 ♦=3 ♣=2 Total = 7

You need to get two more winners. The ♥ suit might provide one of them, but you will still have to establish ♠s. The burning question is whether to win the first ♥ or to hold up. If you take this trick you will have a second stopper if East takes the lead, but you will be in extreme danger if West takes the lead. Since the ♠ finesse has to go into West you should hold up.

West returns the ♥ 9, East takes the ♥ A and clears the suit.

You have lost two tricks so far. Lead the ♠ J and let it ride. West wins their third trick with the ♠ K but has

Play off your 6 winners and concede the last three tricks.

But it sure makes a big difference in how you play the hand.

This might have turned out even better. If West had decided to play his partner for the ♥Q, (who would have played ♥J from a holding of ♥ Q J x), you would have made an overtrick!

Baker Holdup 6

With his 4-3-3-3 distribution North chooses not to bother with Stayman. South is to play 3NT. West leads the ♥6. East plays the ♥J.

Winners: ♠=1 ♥=1 ♦=3 ♣=2 Total = 7

You need to get two more winners. The ♥ suit might provide one of them, but you will still have to establish ♠s. The burning question is whether to win the first ♥ or to hold up. If you take this trick you will have a second stopper if West takes the lead, but you will be in extreme danger if East takes the lead. Since the ♠ finesse has to go into West you should not hold up.

You win with your ♥K, (keeping West in the dark about who holds the ♥Q), enter dummy with the ♦A and play the ♠J, letting it ride to West's ♠K.

West cannot play ♥s without setting up your ♥Q so he will probably exit with a ♣ which you take with the ♣K.

is no need to hold up. But . . . it couldn't hurt, could it?

Yes, it could hurt real bad ♠ suppose West has nothing in his hand but the ♥ K Q J T 8 7 6 that you already know about. When you let his ♥T win the first trick he will realize that his hand is dead. And he may be smart enough, (or lucky enough), to switch to a ♠.

to see why you should definitely win the first trick, then enter dummy with the ♦ A and take the ♣ finesse.

But one of the important considerations you have to think about is the possibility that the Defense will switch to another suit - where you might be in even more trouble.

You'd feel bad on this hand if you let West hold the ♥T only to see him next lay down the ♠J.

Baker Holdup 7

North is to play 3NT. East leads the ♥4. West plays the ♥T.

Winners: ♠=1 ♥=1 ♦=3 ♣=1 Total = 6

You may not agree with North's 3NT bid but how else are you going to get to the only game that has a chance of making?

You need 3 extra winners and they will come from the ♣ suit even if East holds the ♣K and wins your finesse. You may think about holding up on the ♥A for one round just to make sure East has none if he wins the ♣K.

That would be a mistake. It is almost certain that West has a 7-card ♥ suit for his preemptive opening. This is confirmed by East's lead of the ♥4, with a doubleton he would have led a higher card. So there

Hold-ups are usually used in notrump hands, but here you use one to prevent the Danger Hand from gaining the lead. Let East have the ♣ K. He cannot play a red card without helping you so he will surely play another ♣.

Pull trumps in two rounds. Then play the ♦ T and let it ride.

East will win this but he is helpless. Whatever he plays you will be able to discard a ♥ loser on dummy's ♦.

If you had taken the first ♣ trick East would have won your later ♦ finesse, put his partner on lead with the ♣ Q and then swallowed up your ♥ K.

Of course if West had been clever enough to lead a ♥ originally this Deal wouldn't be here.

Baker Holdup 8

North's 2 ♣ cue-bid shows a limit-raise or better in ♣ s. South is to play 4 ♠. West leads the ♣ 2. East plays the ♣ K.

Losers: ♠ = 0 ♥ = 2 ♦ = 1 ♣ = 1 Total = 4

You have one loser too many. If West holds either the ♥ A or the ♦ K this will be an easy contract, but East opened the bidding so he probably has most of the high cards. It does look like West holds the ♣ Q based on his low lead and East's play to trick one.

Having gone through that thought process what is your Plan?

You will need to discard a loser on dummy's fourth ♦, but you must do so without ever letting West gain the lead since West is the defender who can lead through dummy's ♥ K. And the only card that West can get the lead with is the ♣ Q.
