NORTH uses Stayman because he has a 4-card \hat{a}^{TM} suit.

SOUTH's 2

$\hat{a}^{\text{TM}}\mathbb{Y}$

response wasn't exactly what NORTH was hoping for,

so NORTH decides to bid 3 NT.

SOUTH absolutely knows that NORTH holds a 4-card Major -

and also knows that it isn't

$\hat{a}^{\text{TM}}\mathbb{Y}$

s.

So SOUTH bids 4 \hat{a}^{TM} .

NORTH has a rotten hand, and many players would just pass 1 NT.

But NORTH figures that having SOUTH play any 4-4 fit would be better than 1 NT so

he bids $2\hat{a}^{\text{TM}}$, Stayman. This is called "Garbage Stayman", and you can see why.

SOUTH bids 2

\hat{a}^{TM}

and NORTH passes. He would have passed

either $2\hat{a}^{\text{TM}}$ or 2

\hat{a}^{TM}

also.

3 NT by South			

Just having a 4-card Major doesn't mean you must automatically use Stayman.

Here NORTH has a 4-card â™ suit, but decides not to seek a 4-4 fit because his hand wouldn't have any ruffing values in a â™ contract. He bids 3 NT.

Notice that even though SOUTH also has four â™'s the 4-4 fit is not useful to them in

a â™ contract because neither hand can ruff any losers.

4 ♠ by South

NORTH has an invitational (9 point) hand with five ♠'s.

She bids it in the standard way - first transfer SOUTH to ♠'s, then invite

the game by bidding 2 NT.

SOUTH, with 17 points and three ♠'s, accepts the game invitation and chooses 4♠.
