West	North	East	South
Pass	2 NT	Pass	2 ♣
Pass	Pass	Pass	3 NT
3 NT by North			
Lead: ♠ 5			

North is to play 3 NT. East leads the ♠ 5.

Winners: ♠=3 ♥=1 ♦=1 ♣=2 Total = 7

Needing two winners you will naturally consider your 5-card ♣ suit. After unblocking the ♣ A K you will need two entries to your hand; one to lead the ♣ J and drive out the ♣ Q, then a second to enjoy your good ♣ s.

The ♠ suit will provide one entry easily, but should you depend on the ♥ Q for the second entry?

No, for two reasons. Firstly the ♥ Q only gives you a 50% chance of being an entry. But more importantly, you already have your two sure entries in ♠s. As long as you take the first trick with dummy's ♠ A both your ♠ K and ♠ J can be entries.

Win the ♠ A. Play off dummy's ♣ A K. Lead the ♠ 9 to your ♠ J. Play your ♣ J (and another one if necessary) to establish the ♣ suit. Win whatever red card they play next with dummy's Ace. Play the ♠ Q to your ♠ K and cash your established ♣(s). Dummy's other red Ace will be your ninth trick.

You'd have to be very careless to miss this one.

West	North	East	South
Pass	Pass	2 NT	Pass
3 NT	Pass	Pass	Pass
3 NT by East			
Lead: ♣ 5			

East is to play 3 NT. South leads the ♣ 5. You play low from dummy and North plays the ♣ 6.

Winners: ♠ = 1    ♥ = 1    ♦ = 4?    ♣ = 3  
 Total = 9

Although you have 4 ♦ winners, getting to the last couple might not be so easy. You can make 3 ♦ tricks simply by winning your ♦ A, then overtaking your ♦ J with dummy's ♦ Q. But you need that fourth ♦ winner. Can you get it?

Sure you can, by creating an entry in ♣s. It is likely from the opening lead, (and North's play of a small card), that South has led from ♣ Q T 7 5. If you win the first trick cheaply then you will still make your ♣ A K for three ♣ tricks in all.

So don't win cheaply, win the first trick with the ♣ A. Then unblock your ♦ A J. Next play ♣ K. (on which North discards), and a small ♣ toward dummy's ♣ J 9. You are sure to have a ♣ entry to dummy's ♦s, and you will still get three ♣ tricks, just a different three.

You probably would have played the hand the same way you just did, unblock ♦s, then play ♣ A K and a low ♣ toward the ♣ J 9 trying to get a ♣ entry to dummy.

It is only because the ♣ opening lead gives you the chance for a Cheap-Trick that you are tempted to go wrong.

Lead: ♠ Q

South is to play 3 NT. West leads the ♠ Q. East plays the ♠ K, then the ♠ 2 when you hold up.

Winners: ♠=1 ♥=0 ♦=4 ♣=1 Total = 6

You are going to have to be pretty lucky to make this contract. You cannot touch the ♥ suit because a defender would take the ♥ A and it would start raining ♠s.

So you will have to get 3 extra ♣ winners, which means the ♣ finesse absolutely MUST work.

In addition to lucky, you are going to have to be pretty good, too. You will surely have to finesse the ♣s at least twice; that means you need two dummy entries. Can you find them?

Maybe in ♦s. Play the ♦ K, then ♦ Q, watching the defender's cards carefully. When both follow twice you know there is only a single ♦ left out, so you play the ♦ J to dummy's ♦ A. Now take the ♣ finesse. It works! Next play your ♦ 5 to dummy's ♦ 6 and take another ♣ finesse. Both defenders follow so your ♣s are good.

Then your chance of success goes way down. You would have to find East with the doubleton ♣ K.

3 ♣	Pass	3 NT	Pass
6 ♣	Pass	Pass	Pass
6 ♣ by West			
Lead: ♦ Q			

West is to play 6 ♣. North leads the ♦ Q.

Losers: ♠=0 ♥=2 ♦=1 ♣=0 Total = 3

Partner's hand didn't turn out to be what you hoped for, you had in mind maybe the ♥ K and ♦ Q.

But this is what you got. First, be thankful North led a ♦ rather than a ♥. Second, see if you can find a way to fight yourself over to dummy and those three beautiful ♠s.

You have two possibilities for a ♣ entry, but you can only try one of them as you will see.

You can play a high ♣ and hope somebody plays the singleton ♣T. Then your ♣ 9 would be an entry. If this works

you would probably make all 13 tricks, but the chances are very slim.

You can play a low ♣ to dummy's ♣ 8. Assuming a defender takes the ♣T you can win his return and enter dummy with the ♣ 9. This play is guaranteed to give you the entry and is the one you should choose.

When you are missing 4 cards the probability of a 3-1 split is about 50%.

But the singleton can be any one of four cards - in this case it can be the ♣T, ♣ 6, ♣ 3 or ♣ 2. So the chance of one of the opponents holding specifically the singleton ♣T is only one-fourth of 50%, about 12.5%.

need. Do you see a way around this?

Do NOT ruff the second ♠ in dummy, just discard a ♦. If East plays a third ♠ you will ruff in your hand, then unblock the ♠ A, then pull trumps in 3 rounds ending in dummy. And run all those ♣ tricks. If East plays a trump or a ♣ the result will be the same. The defense can get one ♦ trick if they take it right now, but you still make your contract.

North is to play 4 ♥. East leads the ♠ A, then ♠ K.

Losers: ♠ = 1    ♥ = 0    ♦ = 3?    ♣ = 0  
 Total = 4?

This is the kind of hand that can get really messy if you aren't careful. You could ruff the ♠, then try to ruff some ♦s, but the defense can prevent you by leading trumps when you give up the ♦ tricks.

All in all a much better plan is to use dummy's ♣ suit after you unblock the Ace. The only flaw with that idea is that when you ruff the ♠, unblock the ♠ A, then play two rounds of trumps ending in dummy, there will still be a trump left out. And the defender might ruff a ♠ before you can take the discards you
