4 ♠ by North

Lead: ♦ Q

You are North and it is your bid. Decide what you would say, then on BID.

You have 23 points. You must open 2 ♠.

Partner responds 2 ♦ showing 7 or fewer points.

What do you bid?

Following partner's negative response you merely bid your suit at the cheapest level.

You bid 2 ♠ and partner jumps to 4 ♠.

Now what do you say?

Partner's first response told you he has a weak hand. It didn't suddenly turn into T or 11 points. Partner is merely pulling a "He Who Knows, Goes" bid. He thinks you belong in 4 ♠.

North plays 4 ♠. East leads the ♦ Q.

Losers: ♠ 0 : ♥ 3 : ♦ 0 : ♣ 1 : Total = 4

It is possible (but not probable) that ♣s will split 3-3.

It is possible (one chance out of two) that West holds the ♥ A. You could pull trumps, ending in dummy, then lead toward your ♥ K.

It is almost certain that you could ruff your ♥ loser in dummy, but only if you play a ♥ at trick two, leading away from your ♥ K. The defenders will win the ♥ cheaply and probably play a trump. You win dummy's ♠ A and play another ♥ which they also win. They lead a second trump which you win in your hand. You now ruff the last ♥ with dummy's ♠ J, return to your hand, pull trumps and claim.

If instead you decide to lead a ♠ to dummy's ♠ J and lead a ♥ toward your ♥ K you might go down. East could win the ♥ A and play a second trump. When you played the next ♥ East would win again and play a third round of trumps. You would no longer be able to ruff the ♥ loser.

♠ K 10 4	♦ 4 2
♥ 10 6	♦ 9 8 6 4
♦ 7 5 3	♣ A K J
♣ 10 8 6 4 3	

You are South and it is your bid. Decide what you would say, then on BID.

One school of thought says to open 2 ♣ with a hand that is within one trick of game, even though the point count is below 22.

Another school of thought says to go ahead and bid the game, hoping to keep the opponents away from any competition.

Today you take the second and bid 4 ♥.

South plays 4 ♥. West leads the ♦ Q.

Losers: ♠ 3 : ♥ 0 : ♦ 0 : ♣ 1 : Total = 4

You are going to lose the ♣ for sure, so you need to find a way to hold the ♠ losers to 2. The obvious possibility is for West to hold the ♠ A and you lead through him to make the ♠ K a winner. That's a 50% possibility.

But you can improve on that a little bit. If West holds both the ♠ Q J you could make a deep finesse of dummy's ♠ T and East would have to play his ♠ A to win the trick. And if it didn't work and East won with a lesser ♠ you would still have time to play toward the ♠ K.

Win the ♦, pull trumps, lead the ♠ 3 to dummy's ♠ T.

You must modify the Plan a little bit. Now your only hope is that West still holds the ♠ J. So you win the next trick in your hand and lead a ♠ toward dummy's ♠ T. This time West is caught. He plays the ♠ J hoping you had a doubleton, but you still have a ♠ to get to the now high ♠ T.

4 ♥ by North			
Lead: ♠ A			

You are North and it is your bid. Decide what you would say, then on BID.

You are very weak. But you are also not vulnerable.

So with 5 playing tricks you leap to 3 ♥. Partner raises to 4 ♥ and you pass.

North plays 4 ♥. East leads ♠ A, then ♥ 8.

Losers: ♠ 2 : ♥ 1 : ♦ 0 : ♣ 1 : Total = 4

You've already lost 1 ♠, you can't escape the ♣ and it looks like the ♥ is unavoidable also. So that means you can't afford to lose that second ♠.

If you play dummy's ♥ 4 West will win the ♥ K and play another ♥. You will lose that second ♠ and go down 1.

Instead you should rise with dummy's ♥ A, play ♦ A, ♦ K and then a small ♦ which you ruff. Now play your ♠ 9 and ruff with dummy's last trump.

But you don't want to get into the habit of doing what is USUALLY good without thinking through the consequences.

♥ A J 10 6 4		
♦ K J 10		
♣ 5 3		

You are South and it is your bid. Decide what you would say, then on BID.

With a balanced, 17 point hand you open 1 NT. Partner responds 2 NT. What do you bid?

You were invited to bid 3 NT if you have a maximum opener. With 17 points you accept the invitation.

South plays 3 NT. West leads ♠ 5. You put on dummy's ♠ 6 and East plays the ♠ 8.

Winner count: ♠ 2 : ♥ 0 : ♦ 1 : ♣ 5 : Total = 8

The good news is that they didn't lead a ♥. The bad news is that if you give up the lead they probably will.

Assuming the ♣s behave you need to get one more winner. It's possible you could lead toward dummy's ♦ Q but even if it works they would probably attack ♥s. Your best chance of getting an extra trick lies in the ♠ suit.

It is almost certain that West holds the ♠ Q. Of course defenders sometimes don't lead according to the guidelines, but if East had the ♠ Q he would likely have played it at the first trick. In addition, the Rule of 11 tells you there were 6 cards in the North, East and South hands higher than the ♠ 5. You can account for all of them, so West must have the ♠ Q. In that case you can assure the contract by winning the first trick with the ♠ K rather than the ♠ T. In this way you will be able to gain a trick by finessing West for the ♠ Q. It's true that if you won with the ♠ T you would still have both the ♠ K and ♠ A remaining, but you wouldn't have the dummy entry you needed.

Notice how strange this game can be. If your holding was ♠ K 2 rather than ♠ K T you would have had no difficulty coming up with the correct play. But the fact that you can win a cheap trick with the ♠ T tries to lure you into making an inferior play.
