7 NT by North			

SOUTH isn't sure just how much he can make, but surely 6

â™|

isn't

too much to hope for.

He starts with a Gerber 4â™£ and NORTH shows three Aces.

Hmmm, 5â™£ asks for Kings and NORTH shows three.

Hmm, SOUTH can now count all thirteen tricks, so he forgets about the

â™|

slam and bids 7 NT.

4 NT by South

NORTH has 13 points and can contribute six tricks so she figures that twelve tricks will be a slam (dunk).

However, just to make sure the opponents don't take the first two tricks she checks with Gerber.

Uh Oh, missing two Aces she signs off at 4 NT. She could also happily play 5^{â™£}, but it

would be tricky to get there. Very tricky.

4 NT by North

Yes, this has nothing to do with Gerber or Blackwood, but everything to do with smart bidding.

SOUTH has a 16 points and NORTH has 15, 16 or 17. SOUTH wants to be in 6 NT if NORTH has 17,

but merely a Notrump game if she has 15 or 16.

The way to find out is to bid 4 NT - not Blackwood but merely an invitation to bid 6 NT.

In this case, NORTH has but 15 points and declines the invitation. If her

â™¥

Q

were changed to the

â™¥

A she would bid 6 NT and collect her twelve easy tricks.

6 NT by South

When SOUTH opens 1 NT NORTH hopes his hand includes all four Aces so she can bid 7 NT.

So she uses Gerber to find out.

But, when she discovers they are missing an Ace she settles for 6 NT.

7 NT by North			

SOUTH is just shy of a 2 $\hat{a}^{\text{TM}}\mathcal{L}$ opening bid, and when NORTH shows 13-15 points SOUTH

wants to be in a slam.

SOUTH cannot use Blackwood because 4 NT would be a natural invitation, but with NORTH's latest bid

being 2 NT he can use Gerber.

Two Major Aces and two Minor Kings fill the holes in SOUTH's hand so he bids 7 NT.
