♣ A 4	

♠ 6 3	
♥ A J 3	
♦ K 5 2	
♣ K Q J 6 2	

You are East. The bidding has been as shown. You led the ♠K, West played the ♠7 and North the ♠5.

What do you play to the second trick?

When you have made your choice

You can see the ♠6, ♠5, ♠4, ♠3 and ♠2. So the ♠7 is West's lowest ♠, he is doing his best to discourage you from leading the suit again.

North held up with ♠A J x, hoping you would play the suit again and give him two tricks.

If you play the ♦T West will win the ♦A and return a ♠, allowing you to drive out North's ♠A while you still have the ♠A for an entry.

Lead: ♠ K			

You are West. The bidding has been as shown. You led the ♠ K, East played the ♠ 7 and South the ♠ 8.

What do you play to the second trick?

When you have made your choice

You cannot see the ♠ 5. The most likely reason is that East has it, and his ♠ 7 is an encouraging signal. The only reason he would encourage you is if he held either the ♠ A or ♠ J.

Together, you two continue to play ♠s to drive out South's ♠ A. When you get the lead with your ♣ A you will cash your ♠ winners and East will still have the ♦ A for some icing on the cake.

There IS another possibility if South is a better than average Declarer. East just might hold ♠ 9 7, giving South ♠ A J 8 5. South played the ♠ 8 as a falsecard to tempt you into playing the suit again. This isn't too likely, but if it happens just congratulate South for the fine play.

4 ♥ by North

Lead: ♣ A

You are West. The bidding has been as shown. Partner led the ♣ A, dummy played the ♣ 4 and it is your play.

When you have made your choice

East will play the ♣ Q on which you will play the ♣ 2.

East now knows you started with a doubleton, and more importantly, he also knows you want him to play a third ♣.

When he next plays the ♣ K dummy will ruff, but whatever card he ruffs with you will have established a trump trick. When you later win your ♣ K that will be down 1.

Lead: ♦ 5			

You are West. The bidding has been as shown. You led the ♦ 5, East wins the ♦ Q and returns the ♦ 7. South holds up his ♦ A until the third round. He then plays the ♣ Q and it is your play.

When you have made your choice

You assume (hope) that East holds the ♣ A. If he does then he will need help from you to decide which trick he should win. You play the ♣ 8 first, and the ♣ 2 next to show an even number.

If East is paying attention he will know to win the THIRD ♣. This will kill dummy's ♣ suit, and with it South's chance of making 9 tricks.

Lead: ♣ A			

You are West. The bidding has been as shown. Partner led the ♣ A, dummy played the ♣ 2 and it is your play.

When you have made your choice

If you signal with the ♣ 9 East will continue with the ♣ K and another which you will have to ruff. You will give up your NATURAL trump trick by doing so. Worse, you will allow South's ♣ J to be established as a winner that North can later discard a ♦ on.

Much better to play low. Partner will surely switch to a ♦, and North will probably finesse, though it doesn't matter whether he does or not. You will win the ♦ K, return the ♣ 9 back to East's ♣ K, and still have your trump trick for later.

Lead: ♠ A

see, South would have been able to discard a loser on that ♠ J if you hadn't played this way.

You are West. The bidding has been as shown. You led the ♠ A, East plays the ♠ 9, South the ♠ 5. You assume East has signaled you to continue ♠ s, so you play the ♠ Q. On this trick East plays the ♠ 3 and South the ♠ 8. How will you continue?

When you have made your choice

You might just switch suits, but you have a better choice.

If you play your ♠ Q, East won't bother ruffing, South WILL ruff and dummy's ♠ J will be established as a winner.

The best procedure is to lead a low ♠. East will ruff and South will over-ruff but by playing this way you stop the establishment of North's ♠ J. As you can
