Lead: ♠ K

[showcards W:SK E:S7 S:S5 N:S3]

You are East. The bidding has been as shown. You led the ♠ K, West played the ♠ 7 and North the ♠ 5.

What do you play to the second trick?

Play the ♦ 10, NOT another ♠.

You can see the ♠ 6, ♠ 5, ♠ 4, ♠ 3 and ♠ 2. So the ♠ 7 is West's lowest ♠, he is doing his best to discourage you from leading the suit again.

North held up with ♠ A J x, hoping you would play the suit again and give him two tricks.

If you play the ♦ 10 West will win the ♦ A and return a ♠, allowing you to drive out North's ♠ A while you still have the ♣ A for an entry.

Lead: ♠K

There IS another possibility if South is a better than average Declarer. East just might hold ♠ 9 7, giving South ♠ A J 8 5. South played the ♠ 8 as a falsecard to tempt you into playing the suit again. This isn't too likely, but if it happens just congratulate South for the fine play.

[showcards W:SK E:S7 S:S8 N:S3]

You are West. The bidding has been as shown. You led the ♠K, East played the ♠7 and South the ♠8.

What do you play to the second trick?

Play the ♠4.

You cannot see the ♠5. The most likely reason is that East has it, and his ♠7 is an encouraging signal. The only reason he would encourage you is if he held either the ♠A or ♠J.

Together, you two continue to play ♠s to drive out South's ♠A. When you get the lead with your ♣A you will cash your ♠ winners and East will still have the ♦A for some icing on the cake.

[showcards W:CA N:C4]

You are West. The bidding has been as shown.
Partner led the ♣ A, dummy played the ♣ 4

Play the ♣ 8 to encourage a continuation. East will
play the ♣ Q on which you will play the ♣ 2.

East now knows you started with a doubleton, and
more importantly, he also knows you want him to
play a third ♣.

When he next plays the ♣ K dummy will ruff, but
whatever card he ruffs with you will have established
a trump trick. When you later win your ♠ K that will
be down 1.

Lead: ♦5			

[showcards S:CQ]

You are West. The bidding has been as shown. You led the ♦5, East wins the ♦Q and returns the ♦7. South holds up his ♦A until the third round. He then plays the ♣Q

Play the ♣8.

You assume (hope) that East holds the ♣A. If he does then he will need help from you to decide which trick he should win. You play the ♣8 first, and the ♣2 next to show an even number.

If East is paying attention he will know to win the THIRD ♣. This will kill dummy's ♣ suit, and with it South's chance of making 9 tricks.
