Lead: ♠ K

[showcards W:SK E:S7 S:S5 N:S3]

You are West. The bidding has been as shown. You led the ♠ K, East played the ♠ 7 and South the ♠ 5.

What do you play to the second trick?

Play the ♦ 10, NOT another ♠.

You can see the ♠ 6, ♠ 5, ♠ 4, ♠ 3 and ♠ 2. So the ♠ 7 is East's lowest ♠, he is doing his best to discourage you from leading the suit again.

South held up with ♠ A J x, hoping you would play the suit again and give him two tricks.

If you play the ♦ 10 East will win the ♦ A and return a ♠, allowing you to drive out South's ♠ A while you still have the ♣ A for an entry.

Lead: ♠K

There IS another possibility if South is a better than average Declarer. East just might hold ♠ 9 7, giving South ♠ A J 8 5. South played the ♠ 8 as a falsecard to tempt you into playing the suit again. This isn't too likely, but if it happens just congratulate South for the fine play.

[showcards W:SK E:S7 S:S8 N:S3]

You are West. The bidding has been as shown. You led the ♠K, East played the ♠7 and South the ♠8.

What do you play to the second trick?

Play the ♠4.

You cannot see the ♠5. The most likely reason is that East has it, and his ♠7 is an encouraging signal. The only reason he would encourage you is if he held either the ♠A or ♠J.

Together, you two continue to play ♠s to drive out South's ♠A. When you get the lead with your ♣A you will cash your ♠ winners and East will still have the ♦A for some icing on the cake.

[showcards W:CA N:C4]

You are East. The bidding has been as shown.

Partner led the ♣ A, dummy played the ♣ 4

Play the ♣ 8 to encourage a continuation. West will play the ♣ Q on which you will play the ♣ 2.

West now knows you started with a doubleton, and more importantly, he also knows you want him to play a third ♣.

When he next plays the ♣ K dummy will ruff, but whatever card he ruffs with you will have established a trump trick. When you later win your ♠ K that will be down 1.

Lead: ♦5			

[showcards S:CQ]

You are West. The bidding has been as shown. You led the ♦5, East wins the ♦Q and returns the ♦7. South holds up his ♦A until the third round. He then plays the ♣Q

Play the ♣8.

You assume (hope) that East holds the ♣A. If he does then he will need help from you to decide which trick he should win. You play the ♣8 first, and the ♣2 next to show an even number.

If East is paying attention he will know to win the THIRD ♣. This will kill dummy's ♣ suit, and with it South's chance of making 9 tricks.

Lead: ♣A			

[showcards W:CA N:C2]

You are East. The bidding has been as shown.

Partner led the ♣A, dummy played the ♣2

Play the ♣3.

If you signal with the ♣9 West will continue with the ♣K and another which you will have to ruff. You will give up your NATURAL trump trick by doing so. Worse, you will allow North's ♣J to be established as a winner that South can later discard a ♦ on.

Much better to play low. Partner will surely switch to a ♦, and South will probably finesse, though it doesn't matter whether he does or not. You will win the ♦K, return the ♣9 back to West's ♣K, and still have your trump trick for later.

Lead: ♠ A

You are West. The bidding has been as shown. You led the ♠ A, East plays the ♠ 9, South the ♠ 5. You assume East has signaled you to continue ♠ s, so you play the ♠ Q. On this trick East plays the ♠ 3 and South the ♠ 8. How will you continue?

You know that both East and South are now void of ♠ s. You might just switch suits, but you have a better choice.

If you play your ♠ Q, East won't bother ruffing, South **WILL** ruff and dummy's ♠ J will be established as a winner.

The best procedure is to lead a low ♠ . East will ruff and South will over-ruff but by playing this way you stop the establishment of North's ♠ J. As you can see, South would have been able to discard a loser on that ♠ J if you hadn't played this way.
