East probably has a 7-card suit to overcall at the 3-level, so if you play the ♠A West will ruff and one of your winners will disappear. So don't play the ♠A. Duck and let East win the trick while West shows out as expected. East will lead the ♠Q and you duck again. So East will lead the ♠J and you duck one more time, but now you can ruff in your hand.

Lead your ♥Q and finesse, West winning the ♥K. West will probably return a ♦ which you win in dummy. Play the ♥A. Then ruff a ♦ to get back to your hand and pull any trumps left out. Play a ♣ to dummy's ♣A and at long last play dummy's ♠A and discard your ♣ loser.

You always had 10 winners in this hand, as long as one of them didn't disappear.

To make sure the ♠A didn't disappear you had to hold it until West no longer had a trump.

You estimate your hand has 6 playing tricks. That is reasonable for a preemptive 3♥ bid. East overcalls 3♠ and partner bids 4♥. Everybody passes.

North plays 4♥. East leads the ♠K.

North plays 4♥. East leads the ♠K.

Losers: ♠ 1 : ♥ 1 : ♦ 0 : ♣ 1 : Total = 3

This looks way too easy. If the ♥ finesse works and the ♣ finesse works you could make 6. It is when things look too easy that you should look for danger! What if you play the ♠A and West ruffs. What if West also gets a trick with the ♥K and East gets a trick with the ♣Q. What with your ♠ loser you would be down 1.

assure 2 more ♦ tricks. There are lots of possibilities but you must be careful of entries and unblocking. In particular, you only have one entry to your hand (if you don't waste the ♠Q) and that is the ♣K Q. So you need to be sure to unblock the ♠A Q before you try to get to your hand in ♣s.

But there is something you **MUST** do first - test the ♦s. You win the ♠A and play ♦A, ♦K. North shows out on the second ♦! Now you unblock your ♠Q, then lead a ♣ to your ♣Q. Assume a defender takes the ♣A and plays a ♠. You win the ♠K, then the ♣K. Next a ♦ toward dummy, finessing South out of the ♦J. Dummy is now high.

What if you had carried out the plan up to the point when you led a ♣ toward your hand and the defense didn't take their ♣A?

You must abandon ♣s temporarily and take the ♦ finesse. You take your good ♦s and then go back to ♣s.

With 9 points opposite an opening 2♣ bid you are too strong for a negative response.

A suit response would promise a 5-card suit so you bid 2NT. Partner says 4♣.

Partner's jump to 4♣ over your 2NT is Gerber convention.

You have no Aces so you respond 4♦. Partner bids 6NT.

East to play 6NT. South leads the ♠J.

East to play 6NT. South leads the ♠J.

Winners: ♠ 3 : ♥ 2 : ♦ 3 : ♣ 0 : Total = 8

You need 4 more winners. The ♣ suit will provide 3 of them once the ♣A is gone. A 3-2 split in ♦s will

This one is definitely straightforward. You need to get one more winner. You can hope for a 3-3 ♥ split which would mean your fourth ♥ would become a winner, or you can hope that West has the ♦ Q in which case a simple finesse will give you the winner. But instead of making it an either/or situation you can combine your chances.

Win the first trick in either hand and duck a ♥. Win the return and play your 4 ♣ winners (discarding a ♦ from your hand) followed by your other 2 ♠ winners. Then play ♦ A, ♥ K and ♥ A. You will be in your hand with two cards - the ♥ 7 and the ♦ 8. If the ♥ 7 is good, cash it and win the last trick with dummy's ♦ K. If the ♥ 7 is not a winner then finesse the ♦ J.

Always be on the lookout for situations where there are two possible routes to success.

Here the ♦ finesse was one possibility, but by ducking a ♥ you could test the ♥ suit and still keep the ♦ finesse in reserve.

Partner has a balanced hand with 15-17 points. You have a balanced hand with 18 points. Together that makes two balanced hands with 33-35 points.

So you bid 6NT.

North would play 6NT.

Click

South plays 6NT. West leads the ♠ J.

South plays 6NT. West leads the ♠ J.

Winners: ♠ 3 : ♥ 2 : ♦ 2 : ♣ 4 : Total = 11

It's nice to make Plans for slams because there are so few losers to worry about.

4 ♠ by West

Lead: ♦ K

Win the ♦ A and play the ♣ 6 to your ♣ A. Play ♠ A, then a small ♠ to dummy's ♠ J. Lead the ♣ Q. If South covers, ruff and re-enter dummy with a trump so you can discard a ♦ loser on the ♣ J. If South doesn't cover the ♣ Q when you lead it, discard a ♦ immediately. As long as South holds the ♣ K you can make the contract. This is called a Ruffing Finesse.

In some hands there is more than one way to make the contract.

But in this deal the ruffing finesse is the only Plan that works.

You open 1 ♠ and partner responds 2 ♥.

With only 14 points and a 6-card suit you rebid a minimum 2 ♠. Partner raises to 3 ♠.

Your bids show 13-15 points. Partner has decided to invite you to bid game with a maximum. Since you have 14 points it's not really clear whether you should accept the invitation. You decide to add a little for your singleton Ace and bid 4 ♠.

West plays 4 ♠. North leads the ♦ K.

West plays 4 ♠. North leads the ♦ K.

Losers: ♠ 0 : ♥ 2 : ♦ 2 : ♣ 0 : Total = 4

The two fast losers in ♥s can't be helped, but maybe you can get rid of one of the ♦ losers.
