3NT by South

Lead: ♠ 2

North's 3♦ bid was a transfer to ♥s. South is to play 3NT. West leads the ♠ 2.

Winners: ♠=2 ♥=0 ♦=2 ♣=1 Total = 5

Obviously you need to establish 4 ♥ winners and by driving out the ♥A you can manage that handily. The problem is that dummy has only one sure entry, (the ♠A), and the defenders may be good enough to hold up their ♥A twice.

To assure the contract you should win the first trick in your hand with the ♠K. Then play ♥Q, ♥J overtaking with dummy's ♥K so you can continue establishing the suit while you still have that ♠ entry.

None of the other suits were sitting well so overtaking the ♥ was the way to go.

6 ♠ by South

Lead: ♥K

South is to play 6 ♠. West leads the ♥K.

Losers: ♠=0 ♥=1 ♦=1 ♣=0 Total = 2

One of the two red losers must be discarded on dummy's ♣ suit. So you pull trumps, taking two rounds, with ♠K and ♠Q. Then play two top ♣s and ruff a ♣. When West shows out on the third ♣, enter dummy with a trump and ruff another ♣. Dummy's final ♣ is now established, so enter dummy with another trump and discard one of the red losers on the fifth ♣.

As long as the ♣s were no worse than 4-2 you can establish the suit.

Lead: ♦ 6

2 winners anyway. So you play a ♠ which West wins. He takes his 2 ♦s but you are now home free. When you gain the lead again you will get your ♠ winner established and only lose 2 ♠s and 4 ♦s.

If you finessed the ♥ you would have gone down with the defenders winning 4 ♦s, 1 ♥ and 2 ♠s.

If you had played 3 rounds of ♣s you would have gone down with the defenders winning 4 ♦s, 1 ♣ and 2 ♠s.

Only by establishing ♠s can you make the contract.

South is to play 1NT. West leads the ♦ 6, taken by East with the ♦ J. East next plays the ♦ Q on which West plays the ♦ 2. East plays the ♦ 9 which you finally win.

Winners: ♠=0 ♥=2 ♦=1 ♣=3 Total = 6

You only need one more winner and you have several possibilities. The ♥ finesse might work, or the ♣s might split 3-3. But you need to consider the defenders winners also. They have already scored 2 ♦ tricks and will get 2 more as soon as they gain the lead. (The spot cards told you that West has a 5-card ♦ suit.) Plus they have the 2 top ♠s which they can take whenever they like. So if your play sets up just one more trick for them you will go down.

No, you must establish ♠s, the suit where they have

overtake was necessary to make the contract.

South is to play 3NT. West leads the ♠9, taken by East with the ♠A. East next plays the ♠4.

Winners: ♠=2 ♥=2 ♦=1 ♣=3 Total = 8

You only need one more winner and if ♦s split 3-3 you can easily establish a trick in that suit. But what if ♦s split 4-2? If the ♣J falls you can get an extra ♣ trick. In fact, no matter how the ♣s are arranged you can establish your extra trick there.

First make sure that you win the second trick with the ♠K, keeping dummy's ♠Q for a later entry. Then play ♣K, and ♣Q overtaking with dummy's ♣A. Then play the ♣10, losing to the ♣J but establishing the ♣9 while you still have the ♠Q as an entry.

As you see, you couldn't set up a ♦ trick so the ♣

Lead: ♣K			

South is to play 2NT. West leads the ♣K.

Winners: ♠=1 ♥=3 ♦=2 ♣=1 Total = 7

You need to find another winner and the chances are not good. If either black suit splits 3-3 you can establish dummy's fourth card in that suit. But with West's opening lead of the ♣K it is unlikely that ♣s will split. So your only slim hope is that the ♠s split 3-3 and dummy's fourth ♠ will be a winner.

Win the first trick and play a ♠ to the ♠A. Then play another ♠. The defense will win and probably take some ♣ tricks. When they have finished and play a red card, you win it and play a third round of ♠s. If both defenders follow to all three ♠s then dummy's ♠8 is now a winner.

This time you were lucky and the ♠s split evenly. Next time they probably won't and you'll go down.
