Only by watching what East plays. On the ♦J East played the ♦2, a low card signaling that he held an ODD number of ♦s. ODD must be either one or three so when he followed to the next ♦ you know he started with three. A little bit of counting tells you that North started with the doubleton Jack, so you want to win the second ♦ trick.

This defense holds North to one ♦ tricks, if you had let him win the second one he would have had 9 tricks.

[showcards S:DJ W:D2 N:D4]

You are West. The bidding has been as shown.

Partner led the ♥Q, you played low and North won the ♥A.

North now plays the ♦J on which East plays the ♦2. What do you play now, and what is your plan.

Play the ♦3 and when North plays another ♦ win with your ♦A.

South hoped his ♦ suit would provide enough tricks to make the game. You can see that there is no entry to the South hand EXCEPT in ♦s, so you want to win your ♦A on the trick that North plays his last ♦. How can you tell which trick that is?

[showcards S:ST]

You are South. The bidding has been as shown. You led the ♥4, North plays the ♥J, won by East with ♥A.

East plays the ♠J, you follow with ♠5, dummy ♠3 and North plays the ♠2. East continues with the ♠10

Play the ♠6.

North's ♠2 tells you he had an ODD number of ♠s, obviously 3. Since East also must have 3, you must take your ♠A on the third round, depriving dummy of the extra ♠ trick.

East may now turn to the ♦ suit, but your side can win the first ♦ and drive out East's ♥K. You will win 2 ♥s, 2 ♦s and the ♠A, down 1

Lead: ♥5

♥A and he can see that you don't want him to lead a ♠ or a ♦. He deduces that you might like a ♣ so he plays his ♣2 and you win 4 tricks.

[showcards W:H5 N:HT]

You are East. The bidding has been as shown.

Partner led the ♥5, dummy played the ♥10

Play the ♦3 (or the ♠2).

You really want West to lead a ♣ if he gets into the lead. If you discard the ♣9 West will surely get the message and will lead a ♣. BUT - you will only win 3 ♣ tricks. The ♣9 would have been the fourth winner.

So instead, play a low card in one of the other suits, say the ♦3.

South is one trick short and he sees he can easily get that trick in ♥s. So he plays a second ♥ from dummy and you now discard the ♠2. West takes the

dummy and you now discard the ♠2. West takes the

You are North. The bidding has been as shown. You led the ♥ 4, South takes the ♥ A and returns the ♥ 3. You ruff and then play what???

Play a low ♣.

Partner played the ♥ 3, a low card, for you to ruff. That means his re-entry, if he has one, is in the lower-ranking suit.

Partner takes the ♣ A and gives you a second ♥ ruff.

cash another ♣, then cash your ♦ Q. That first signal led to your side winning the first 6 tricks. Wow.

[showcards W:DA N:D3]

You are West. The bidding has been as shown.

Partner led the ♦ A, dummy played the ♦ 3

Play the ♦ 2.

You know partner also has the ♦ K, and normally you would give an encouraging signal when you hold the Queen. But with this hand you want partner to switch to ♣s as soon as possible. So you play a low ♦.

East looks at your signal, then looks at dummy, then looks at your signal. He knows you want a switch and it looks like a switch to ♣s might work the best. North plays a low ♣ from dummy, you win the ♣ J. Next you play a low ♦, taken by East with his ♦ K. East leads a ♣. Dummy plays the ♣ K, you win that,

Lead: ♥ A

[showcards W:HA E:HQ S:H5 N:H6]

You are South. The bidding has been as shown. You led the ♥ A, North puts on the ♥ Q. It's your play.

Play the ♥ 2.

North's ♥ Q is either a singleton, (practically impossible), or a signal showing that he also holds the ♥ J. In either case you can reach the North hand on the second trick by playing a low ♥. Since you don't particularly want to start playing ♦ s from your side, you go ahead and play a small ♥, won by North with the ♥ J.

North next plays the ♦ Q and however East tries it your side will take the next two ♦ tricks and set the contract.
